EDUCATION

Master of Computer Application(MCA)

Degree in Degree in SRM Institute of Science and Technology
CGPA: 8.28

Aug 2025 - mar 2027

Bachelor of Science (Computer Science)

Degree in Degree in Syed Ammal Arts and Science College,Affiliated Alagappa University Aug 2022 - may 2025

EXPERIENCE

AICTE | AWS Cloud Internship

virtual inership | oct 2025 - Jan 2026

Completed a 3-month virtual internship focused on AWS Cloud Computing and cloud technologies. Gained practical knowledge of core AWS services such as EC2, S3, IAM, and VPC, along with concepts related to cloud infrastructure, storage, networking, security, and deployment. Worked on hands-on labs and practical assignments to understand how cloud-based applications and resources are managed, deployed, and secured. Developed a strong foundation in cloud computing concepts and AWS services while improving technical and problem-solving skills

SKILLS

Programming Languages: Python, Boot strap 5, HTML, javaScript, FastAPI, React
Libraries/Frameworks: Flask-SQLAlchemy, Pandas, Numpy, TensorFlow
Tools / Platforms: Git hub, VS Code, AntiGravity, Claude, GoogleFlow
Databases: SQL, SQLite, Excel

PROJECTS / OPEN-SOURCE

ResQ Emergency Ambulance Booking & Real-Time Dispatch System | [Link](#) *Python, FastAPI, React, Vite, JavaScript, SQLAlchemy, WebSockets, JWT, SQLite, Leaflet, OpenStreetMap, Pytest*

- Developed a full-stack emergency ambulance booking and real-time dispatch system connecting citizens, ambulance drivers, hospitals, and dispatchers.
- Implemented JWT-based authentication and role-based access for Citizen, Driver, Hospital, and Dispatcher portals.
- Built REST APIs and WebSocket-based real-time communication for emergency dispatch, ambulance status, and live location updates.
- Integrated Leaflet and OpenStreetMap for ambulance tracking, hospital locations, and route visualization.
- Designed database models using SQLAlchemy with SQLite/PostgreSQL-ready architecture and implemented emergency workflow management.
- Developed and tested asynchronous backend services using FastAPI, AsyncIO, Pytest, and AsyncClient.

Haja Bhai Tea Shop E-Commerce Web Application

Bootstrap5, Flask, HTML,Python,Javascript

Built a full-stack e-commerce web app for a tea shop using Flask and SQLite, allowing users to browse products, manage carts, place orders, and track them with UUID-based tracking for a seamless shopping experience.

Implemented secure user login with password hashing and admin access control. Used Fetch API for quick cart updates and automated GST and delivery charge calculations to streamline checkout.
